

Project '82: overview drawings from 1985

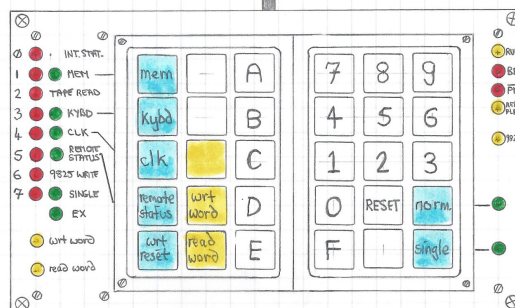

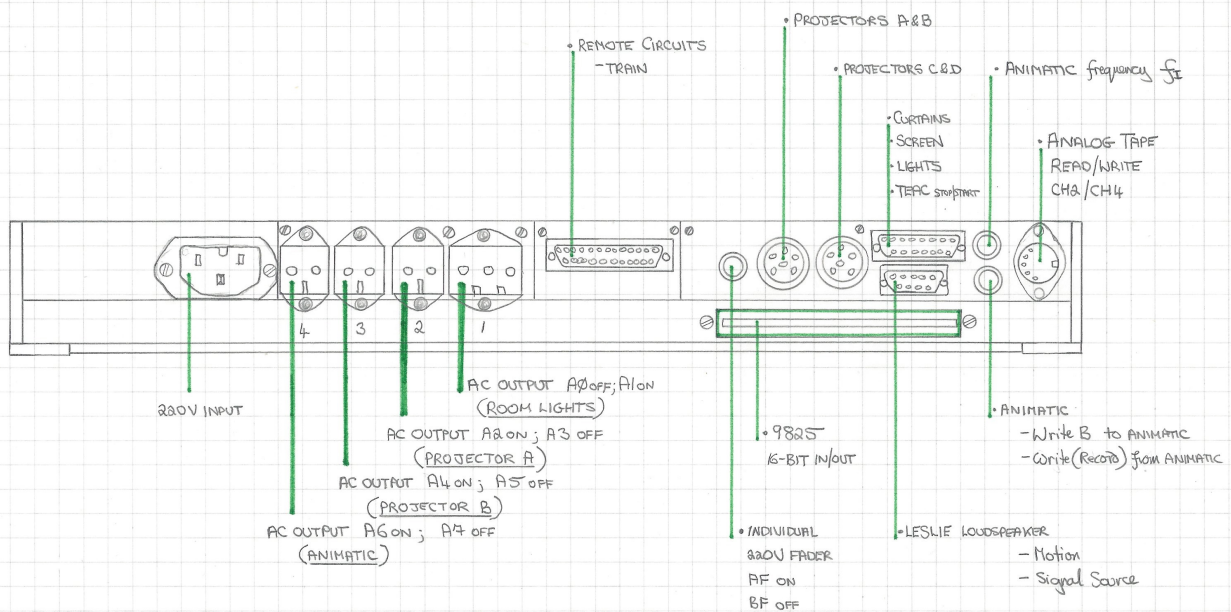

PROJECT EIGHTY TWO

THE P82 CONTROLLER
AND ITS KEYBOARD

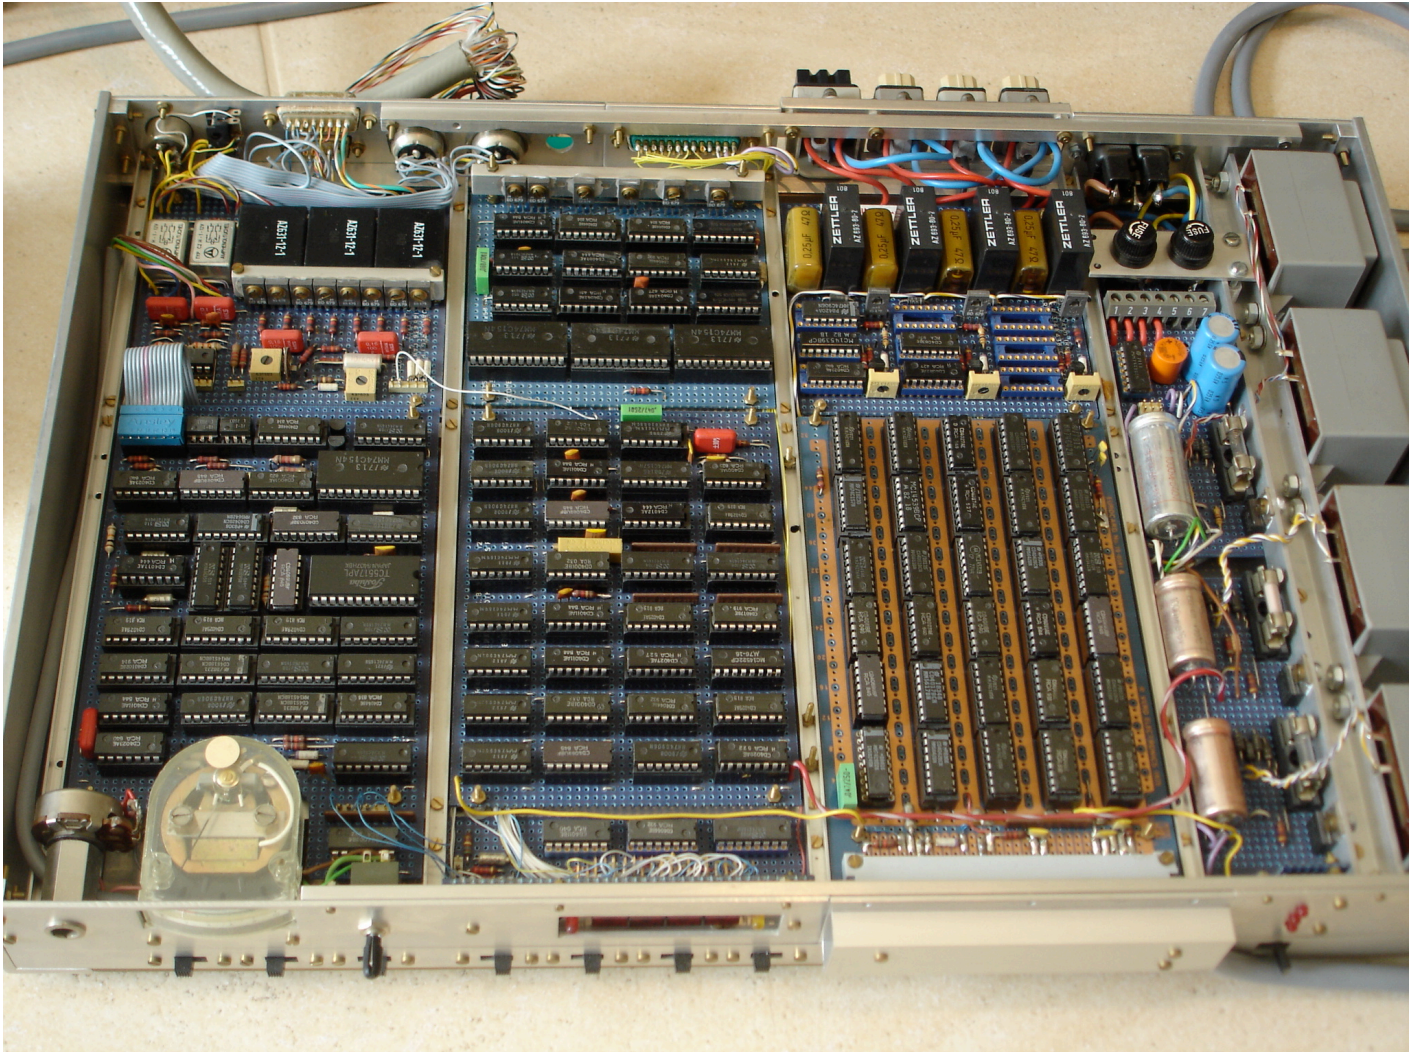

PROJECT EIGHTY TWO

THE PB2 CONTROLLER
REAR PANEL CONNECTORS

P82 central control unit (keyboard removed)
HP9825A interface cable connected in rear.
Three power supplies, 16 & 24-pin IC's, solid state drivers
for low-voltage devices, mechanical relays for 220v and
low voltage external circuits.

P82 central control unit showing underside of wire-wrap
circuit boards
and (blue) cabling to HP9825A interface connector
